Gistel, Belgium, May 2010

Summa's Premiere at Fespa

Premiere in Europe. At Fespa 2010, Summa will release its latest development into the European public: the Summa F Series.

On booth 260, hall B3, Summa will demonstrate the **F1612** model: Summa's first flatbed cutter. On this flatbed cutter, up to three work modules with different working tools can be mounted at once. This guarantees the highest cutting quality and versatility.

Another highlight Summa will exhibit on Fespa is the **S75T4**. OPOS-CAM, a factory upgrade option which has already proven to be very successful on Summa S Class S140T and S160T, will by now also be available on the S Class S75T. This camera recognition alignment solution for the S75T is particularly

interesting for sheet applications in the screen printing industry.

Of course, Summa will also present its renowned professional cutter series, Summa S Class and SummaCut which are well-known since many years – **S160T Wireless**, **D160R** and **D60R** – as well as the **Summa DC4**, the environmentally friendly thermal transfer printer-cutter.

The Summa team will also be present at Fespa to welcome the visitors, to inform them and to organize demonstrations.

About Summa

Summa manufactures and distributes graphic imaging products for the sign making, labeling, vehicle wrap, aerospace and outdoor advertising industries. Its products include SummaCut and Summa S Class vinyl cutting plotters and the industry's most environmentally friendly printer, the Summa DC4 wide format thermal transfer printer line. As from fall 2010, the F Series flatbed cutter will join Summa's product line.

Summa's European headquarter in Gistel, Belgium, can be reached by calling +32 59 270011 or via the Web at www.summa.eu.
